

Blocked Changes and Desktop Action Guide

This file summarizes what could not be changed automatically and what to do on your desktop account.

A) What was blocked in cloud automation

1) Upwork profile direct extraction

- **URL provided:** `https://www.upwork.com/freelancers/~01e21ef6242b1686d8?mp_source=share``
- **Observed response:** Cloudflare protection page (403 / Just a moment)
- **Impact:** Live profile fields could not be fetched automatically.

2) GitHub account/repository metadata operations

- **Blocked actions:**
- create new repositories in `sky-brazil`` via API/CLI integration token;
- edit repository topics;
- edit account-level fields (bio, pinned repos) through this environment.
- **Observed error:** `Resource not accessible by integration``

B) What was completed successfully

- Repository professionalism upgrades (README, LICENSE, CI, structure)
- Three curated portfolio projects prepared for standalone publication
- English-only documentation and templates
- Automated split script prepared: `scripts/split_portfolio_projects.sh``

C) Desktop actions to complete

1. Run curation commands from:
 - `docs/GITHUB_CURATION_COMMANDS.md``
2. Run project split:
 - `bash scripts/split_portfolio_projects.sh sky-brazil``
3. Pin repositories in GitHub profile UI
4. Update GitHub bio with a commercial positioning line
5. Apply Upwork copy from:
 - `docs/UPWORK_PROFILE_TEMPLATE_EN.md``

D) Suggested GitHub bio

`Python Automation Developer | Web Scraping, Dashboards, and Telegram Bots for SMBs | Fast MVP delivery``

E) Suggested next review package

If you share screenshots/text from your live Upwork profile fields, I can deliver:

- finalized headline
- finalized overview
- optimized skills list
- optimized text for the 3 portfolio entries
